ORACLE®   oAppsNET

OAN UX FOR BUSINESS DOCS

The OAN UX for Business Docs solution include user friendly modern screens on top of Oracle® WebCenter content to enhance the end user experience of managing and viewing your organization documents. We also have pre built integrations to Oracle® ERP applications to managed your documents outside of your ERP system. We continue to evolve our solution by integrating with Oracle® AI – Document Understanding to automate metadata collecting.

WHY CHOOSE OUR OAN UX FOR BUSINESS DOCS?

MODERN USER SCREENS
Our Modern user screens, provide clear and simplified layouts to manage and view your organizational documents.

SECURE & CENTRALIZED
Your documents are in good hands as Oracle® WebCenter multi- layer security keeps your documents safe and secure in a centralized location.

PREBUILT INTEGRATIONS
We have pre built integrations to Oracle® Fusion and EBS ERP systems along with integrations to Oracle® AI Document Understanding pre train or custom models.

WORKFLOWS & APPROVALS
The ability to enable pre-built document workflows to review, manage & approve your documents prior to storing them in WebCenter content application.

1 WEBCENTER PURCHASE & INSTALL

Purchase Oracle® WebCenter Content Management & Imaging software licenses.

Install WebCenter Content Management and Imaging on your preferred technology stack.

2 PROVISION OAN UX FOR BUSINESS DOCS

- Oracle® Cloud Infrastructure
  - oAppsNET® Tenancy blah blah
  - Client Tenancy
- Other Cloud Providers
- On-Premises Data Center

3 CONFIGURE YOUR REPOSITORY

In WebCenter, configure your Repository(s) and setup your application and document level security.

In OAN UX for Business Docs, configure our application to align with your WebCenter Imaging Repositories, configure the OAN REST APIs, select an Oracle Artificial Intelligence Model, and select your OAN Workflow Type.

SOLUTION FEATURES

DOCUMENT STORAGE
DOCUMENT STORAGE The "heart" of the applications document storage is Oracle's WebCenter Content. oAppsNET applies a "headless" architecture on top of WebCenter content to manage your documents. WebCenter also provides the governance and auditing capabilities needed to minimize the risks and costs associated with regulatory and legal compliance.

PREBUILT INTEGRATIONS
oAppsNET's solution includes prebuilt connectors for both Oracle® EBS and Fusion Apps so you can manage your ERP documents outside your ERP system. We also have integrations to Oracle's pre-trained AI models and we also have the capability to integrate any custom-trained models. Furthermore, oAppsNET created REST APIs on top of WebCenter Content to help manage your documents stored all across your organization.

STORE, SEARCH, AND RETRIEVAL
oAppsNET designed and built modern user interface screens to store, maintain, search and retrieve documents stored in the WebCenter Content repositories. Our user-friendly approach allows our search criteria to be aligned with your target enterprise system(s) (i.e. EBS, Fusion Apps) to allow for a seamless user experience.

MULTI-LAYER DOCUMENT SECURITY
WebCenter has a multilayered security approach to protect who has access to your documents. The application security layer controls who is allowed on the platform and what role(s) they have. The administration role manages repositories and who has access to each given repository. For each repository, users are given certain rights to view, create, update, or delete documents. In addition to WebCenter security, oAppsNET has an additional security layer for your REST APIs so you have total control of your documents not matter how they are accessed.

ARTIFICIAL INTELLIGENCE
oAppsNET can be integrated with the most common AI platforms, and this allows your organization to take advantage of Oracle's AI – Document Understanding models to automate the manual steps of associating metadata to any given document.

NATIVELY BUILT INTO THE OAN PLATFORM
The OAN UX for Business Docs application is natively integrated with our OAN platform of products (i.e., Accounts Payable Order Management, Vendor Management, Contracts Management, Digital Signature Solution for Adobe® and DocuSign®).

ABOUT OAPPSNET

We're a US-based company specializing in the digital transformation of every facet of your organization.

As an Oracle-certified partner with over 25 years of experience, we can ensure that your business' transition to our platform costs less, requires less time, and provides you with the efficiency that will drive your company to the next level.
